

MATHEMATICS LEARNING PROGRAM

Dear Parents / Guardians,

This is a courtesy letter confirming that your child has been given access to a valuable online learning program called “Smartkiddies Mathematics”. Our school has unrestricted access to the program during school hours and your child has homework mode access to two lessons per day – all available at no cost.

About the Program

The aim of Smartkiddies is to develop skills and motivate learning through reward and enjoyment.

The program benefits students by helping to master the skills they have been taught in the classroom, using an engaging program that is developed by experienced teachers.

It is NOT compulsory for your child to visit Smartkiddies from home, but any additional access to this site will be beneficial. This is a great opportunity for your child to build up their confidence and improve their skills, from home, on an educational website.

To access Smartkiddies from any computer go to **www.smartkiddies.co.uk** and sign in with the username and password your child has been given.

Parents as Partners

“One of the most critical factors in a child’s education is a parent’s involvement”

Below is a list of activities you can do with your child (some activities allow the parent to play as well).

- Walk the Plank (terminology game)
- Maths Battles (numeracy game)
- World Series (compete against others from around the world)

If you need help logging in for any reason or if you have any questions please email **support@smartkiddies.co.uk**
