DRUGS EDUCATION POLICY ~ March 2003 –Reviewed

DESCRIPTION OF THE SCHOOL NEIGHBOURHOOD:

St Peter's School is housed in modern buildings and is situated in a pleasant residential area on the fringe of the town. The school backs on to agricultural land. Nearly all the children come from owner-occupier homes where one or both parents are earning. There is a very small ethnic minority in school. A small number of children receive free school meals. About a quarter of the children come from single parent families or have a stepparent. Key Stage II SATS results have been consistently well above the national and county average.

The "open aspect" of the school has now been enclosed with high-level security fencing. Previously the openness of the field had led to young people from the community congregating at the rear of the school during out of school hours and substantial evidence of solvent and drug abuse had been found and reported to the police. This has now been very significantly reduced.

Aims and objectives

- 1.1 We aim to equip children with the knowledge, understanding and skills that enable them to make the sort of choices that lead to a healthy lifestyle. Our drugs education programme has the primary objective of helping children to become more confident and responsible young people. We teach children about the dangers to health posed by drug taking, and we aim to equip them with the social skills that enable them to make informed moral and social decisions in relation to drugs in society.
- 1.2 The objectives of our drugs education programme are:
 - to provide and increase children's knowledge and information about illegal drugs and solvent abuse and the harmful effects they can have on people's lives;
 - to enable children to discuss moral questions related to drug taking, and so provide a safe environment for young people to share their thoughts and ideas;
 - to help children become more self-confident so that they are able to make sensible and informed decisions about their lives;
 - to let children know what they should do if they come across drugs, or are aware of other people misusing drugs;
 - to help children respect their own bodies and, in so doing, reduce the likelihood that they will be persuaded to become involved in drug abuse;
 - to show that taking illegal drugs is a moral issue, and that choices about drugs are moral choices;
 - to ensure that all children are taught about drugs in a consistent manner, following guidelines that have been agreed by parents, governors and staff.

- To know the important and beneficial part which drugs played in society.

MORAL VALUES

- The school condones neither the misuse of solvents, drugs, alcohol or any other substances by members of the school, nor the illegal supply of these substances.
- The school is committed to the health and safety of its staff and pupils and will take action to safeguard their well-being.
- The school acknowledges the importance of its pastoral role in the welfare of the young people in its care.

EQUAL OPPORTUNITIES:

All pupils will have access to all aspects of the Health Education Programme in the school.

2 Organisation

- 2.1** We regard drugs education as a whole-school issue, and we believe that opportunities to teach about the importance of living a healthy lifestyle occur throughout the curriculum. Each class teacher answers questions about drugs sensitively and appropriately, as they occur. In the routine sessions, we encourage children to discuss issues that are important to them, and we help children to be aware of the dangers of the misuse of drugs. For example, if a child raises the issue of smoking, the teacher takes time to discuss its harmful effects with the whole class. In science lessons we teach children what a drug is, and how drugs are used in medicine. We also teach them the difference between legal and illegal drugs.
- 2.2** Drugs education is an important part of our school's personal, social and health education (PSHE) curriculum. The main teaching about drugs takes place in Year 6, where the children are taught about illegal drugs, and the dangers involved to those who take them. In teaching this course we follow the guidelines provided by the LEA, and we receive advice and support from the Local Health Authority. The resources and materials that we use in these lessons are recommended either by the Health Authority or the LEA. Lessons that focus on drug education form part of a sequence of lessons that are designed to promote in children a healthy lifestyle.
- 2.3** The children's class teacher teaches them drug education in normal lesson time. Sometimes the class teacher seeks support from the school nurse or another health professional. The teaching style that we use encourages children to ask questions and reflect on the dangers to health of drug misuse. Children explore issues, such as why people take drugs, and how they can avoid putting themselves in danger in the future. We give children the opportunity to talk in groups or to the whole class. We encourage them to listen to the views of others, and we ask them to explore why drugs are such a problem for society.

3 The role of the Headteacher

- 3.1** It is the responsibility of the Headteacher to ensure that staff and parents are informed about this drugs education policy, and that the policy is implemented effectively. It is also the Headteacher's role to ensure that staff are given sufficient training, so that they can teach effectively and handle any difficult issues with sensitivity.

3.2 The Headteacher will liaise with external agencies regarding the school drugs education programme and ensure that all adults who work with children on these issues are aware of the school policy and work within this framework.

3.3 The Headteacher will monitor the policy on a day to day basis and report to governors, when requested, on the effectiveness of the policy.

4 The role of governors

4.1 The governing body has the responsibility of setting down these general guidelines on drugs education. The governors will support the Headteacher in following these guidelines. Governors will inform and consult with parents about the drugs education policy. Governors will also liaise with the LEA and health organisations so that the school's policy is in line with the best advice available.

5 The role of parents

5.1 The school is well aware that the primary role in children's drugs education lies with parents. We wish to build a positive and supporting relationship with the parents of children at our school through mutual understanding, trust and co-operation. In promoting this objective we will:

- inform parents about the school drugs education policy and practice;
- offer parents opportunities to view the materials used to teach drugs education in our school;
- answer any questions parents may have about the drugs education their child receives in school;
- take seriously any issue which parents raise with teachers or governors about this policy or the arrangements for drugs education in the school;
- encourage parents to be involved in reviewing the school policy and making modifications to it as necessary;
- inform parents about the best practice known with regard to drugs education so that the parents can support the key messages being given to children at school.

6 Monitoring and review

6.1 The governing body will monitor on an annual basis the drugs education policy. Their findings and recommendations will be used if the policy appears to need modification. The governing body takes into serious consideration any representation from parents about the drugs education programme and comments will be recorded. Governors require the Headteacher to keep a written record detailing the content and delivery of the drug education programme taught in the school.
